

## Redesign Project – Jennifer Morelock

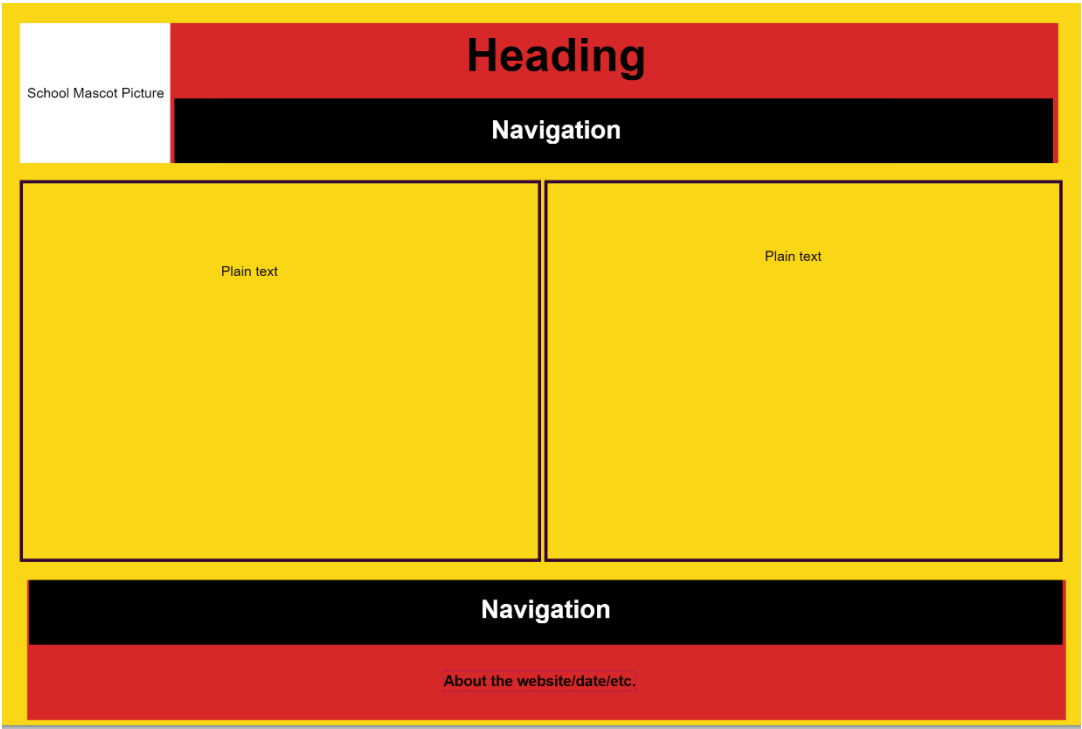

For the Redesign Project, I will be working on the Classroom Website. I chose this website because it is the most relevant to my position as a classroom teacher. I plan on streamlining the colors, fonts, navigation so that each page of the site is the same. I will also adjust the images to better fit the page.

I would like to have a Red, Yellow, White, and Black color scheme based off the Mascot of the school. The background will be yellow. The header will be red with the picture of the mascot on the left side and the name of the website centered beside it in black. Underneath the title will be a horizontal navigation bar, black with white text and red hover text. Below that will be boxes with a solid black border (2 side by side) for text. At the bottom of the page will be another red box with navigation (matching the top) and site information below that in black. The fonts will be primarily Helvetica, Arial, Sans-Serif.

The mobile site will be mostly the same except for there will be a more vertical design. Image, header, and navigation will be one above the next, the information text boxes will be one on top of the next and the footer will also be vertical.
